

Agreement of Understanding Pregnancy During Enrollment

The Pregnancy Policy for Radiologic Technology Students essentially states:

The student has the option to inform the Program Director of a pregnancy in writing. The student will be counseled regarding safety, and must produce documentation from her doctor that she may continue in the Program.

If the student does not inform the Department Chair of her pregnancy, the above measures cannot be taken. These measures are for the benefit of the student and the baby. Without the student's cooperation, the approved, usual and standard safety precautions cannot be implemented.

Clinical attendance policies will apply equally to a pregnant and non pregnant woman.

I, _____, have read the above and I understand that it is in my best interests to comply with the Radiologic Technology Program's Pregnancy Policy.
