

Career Opportunities in
Graphic Art/Photography – Graphic Arts
GRAPHIC DESIGNER

Nature of the Occupation:

Graphic Designers/Artists are people with a desire to create. They combine technical expertise with artistic ability to turn abstract ideas into unique projects. Graphic Designers produce art for commercial services such as major corporations, advertising agencies, public relations departments, design firms, or printing and publishing firms. Due to the low overhead costs, many graphic designers work from their homes as freelance graphic designers either on a full- or part-time basis. Some duties include:

- Consult with clients to establish the overall look of the product
- Develop or create the graphic elements for a project
- Estimate cost of materials and project timelines
- Supervise other graphic designers

Education and Training:

New media has created a serious need for talented graphic designers, using a variety of graphics and layout computer software to assist in the designs. Designers creating Web pages or other interactive media designs also will use computer animation and programming packages. Formal training is available in a two-year Associate in Applied Science degree, as well as certificate options in Photography and/or Graphic Arts.

Working Conditions:

Working conditions and places of employment vary. Graphic designers generally work in art studios, at home, or in offices. They usually work a 40-hour week but frequently work overtime to meet deadlines. Many graphic artists also freelance for occasional clients. They may also use computers for extended periods of time.

Salary Range:

\$22,000 - \$50,000 per year.

Employment Outlook:

Employment of graphic designers is expected to grow 10 percent, about as fast as average for all occupations from 2006 to 2016, as demand for graphic design continues to increase from advertisers, publishers, and computer design firms. Some of this increase is expected to stem from the expansion of the video entertainment market, including television, movies, video, and made-for-Internet outlets.
