ADDENDUM #1

DATE: July 20, 2022

TO: Prospective Proposers

RE: Addendum #1
Tyler Junior College
CSP No: J2120-22-08

NOTICE TO PROPOSERS:

This Addendum forms a part of the Notice to Bidders. **Acknowledge receipt of this Addendum in the Proposal/Quote.** Failure to do so may subject Proposer to disqualification.

QUESTION 1: What paver type and design will be required? We will need a base of design to give you a bid. Also will they be traffic rated?

ANSWER: Pavers do not need to be traffic-rated. Addendum #2 will be posted in the next couple of days with a paver spec.

QUESTION 2: Can we please clarify what the new brick paver (Herringbone pattern) is to be. There are notes describing all the other products and another note that says “match admin building”, but refers to the retaining wall. I don’t see a clear note that defines what the actual pavers are for the patio areas. I believe it was in the meeting to match the existing patio pavers, but I do not want to assume.

ANSWER: The color and mix should match existing as close as possible. Addendum #2 will be posted in the next couple of days with a paver spec.

QUESTION 3: Another RFI we would like to submit on behalf of our landscaping subcontractor is to clarify if root barriers will be required for the new trees. If so, please define the type and size of the root barrier required.

ANSWER: Root barriers are not required.

QUESTION 4: An additional RFI we would like to submit is in regards to Note 7 on Sheet LT-1. It calls for rigid electrical conduit; however, PVC conduit is the industry standard for underground conduit. Please verify if PVC can be used.

ANSWER: PVC conduit is acceptable.
